IMPORT STATISTICS
William C. George

REPORT NO. FT 110

General imports include the following types of transactions:

(a) Immediate consumption entries:

(1) Commodities which, upon arrival, enter immediately into domestic merchandising or consumption channels.

(2) For statistical purposes, commodities such as wheat and petroleum products entered directly into bonded manufacturing warehouses for further processing to be subsequently withdrawn for exportation are included with immediate consumption entries.

(b) Warehouse entries:

(1) Commodities entered into bonded storage warehouses.

(2) Imported ores and crude metals such as copper, lead, and zinc entered into bonded smelting and refining warehouses are included with warehouse entries.

A complete discussion of the compilation procedures and coverage for import statistics will be found in the foreword to the 1944 edition of Foreign Commerce and Navigation of the United States. Copies of the foreword are obtainable upon request.

Commodity descriptions and country names are abbreviated in this report where space does not permit complete description. See Schedule A, Statistical Classification of Imports Into the United States, for complete commodity descriptions and Schedule C, Code Classification of Countries (published as a part of Schedule A), for unabbreviated country names. A separate edition of Schedule C showing the countries, adjacent provinces, territories, and islands included under each country designation is also available.

The omission of a commodity classification or country name from this report indicates no transactions for that commodity or country.

Statistics of general imports of merchandise not shown in this section will be found in other sections of this report according to Schedule A commodity group.

1/ The shipping weight may include that of minor components of the ore when this ore is composed of two or more components. In such event, these minor components are reported under their respective commodity numbers without a shipping weight. Wherever the shipping weight for the ore from a given country is less than the gross weight of the ore, there may have been transactions fully reflected in the gross weight totals but for which the shipping weight has been assigned only to the chief component of the transactions.

RALPH E. GALLOWAY
Executive Assistant to the Director

Prepared under the supervision of

J. EDWARD ELY
Chief, Foreign Trade Division

IRVING WEISS
Assistant Chief

IMPORT STATISTICS
William C. George

REPORT NO. FT 110

General imports include the following types of transactions:

(a) Immediate consumption entries:

(1) Commodities which, upon arrival, enter immediately into domestic merchandising or consumption channels.

(2) For statistical purposes, commodities such as wheat and petroleum products entered directly into bonded manufacturing warehouses for further processing to be subsequently withdrawn for exportation are included with immediate consumption entries.

(b) Warehouse entries:

(1) Commodities entered into bonded storage warehouses.

(2) Imported ores and crude metals such as copper, lead, and zinc entered into bonded smelting and refining warehouses are included with warehouse entries.

A complete discussion of the compilation procedures and coverage for import statistics will be found in the foreword to the 1944 edition of Foreign Commerce and Navigation of the United States. Copies of the foreword are obtainable upon request.

Commodity descriptions and country names are abbreviated in this report where space does not permit complete description. See Schedule A, Statistical Classification of Imports Into the United States, for complete commodity descriptions and Schedule C, Code Classification of Countries (published as a part of Schedule A), for unabbreviated country names. A separate edition of Schedule C showing the countries, adjacent provinces, territories, and islands included under each country designation is also available.

The omission of a commodity classification or country name from this report indicates no transactions for that commodity or country.

Statistics of general imports of merchandise not shown in this section will be found in other sections of this report according to Schedule A commodity group.

Shipping weight, previously shown in this report, is discontinued effective with the statistics for the month of July, 1947.

IMPORT STATISTICS

William C. George

REPORT NO. FT 110

General imports include the following types of transactions:

(a) Immediate consumption entries:

(1) Commodities which, upon arrival, enter immediately into domestic merchandising or consumption channels.

(2) For statistical purposes, commodities such as wheat and petroleum products entered directly into bonded manufacturing warehouses for further processing to be subsequently withdrawn for exportation are included with immediate consumption entries.

(b) Warehouse entries:

(1) Commodities entered into bonded storage warehouses.

(2) Imported ores and crude metals such as copper, lead, and zinc entered into bonded smelting and refining warehouses are included with warehouse entries.

A complete discussion of the compilation procedures and coverage for import statistics will be found in the foreword to the 1944 edition of Foreign Commerce and Navigation of the United States. Copies of the foreword are obtainable upon request.

Commodity descriptions and country names are abbreviated in this report where space does not permit complete description. See Schedule A, Statistical Classification of Imports Into the United States, for complete commodity descriptions and Schedule C, Code Classification of Countries (published as a part of Schedule A), for unabbreviated country names. A separate edition of Schedule C showing the countries, adjacent provinces, territories, and islands included under each country designation is also available.

The omission of a commodity classification or country name from this report indicates no transactions for that commodity or country.

Statistics of general imports of merchandise not shown in this section will be found in other sections of this report according to Schedule A commodity group.

Shipping weight, previously shown in this report, is discontinued effective with the statistics for the month of July, 1947.

UNITED STATES GENERAL IMPORTS OF MERCHANDISE

JULY 1947

IMPORT STATISTICS
William C. George

REPORT NO. FT 110

General imports include the following types of transactions:

(a) Immediate consumption entries:

(1) Commodities which, upon arrival, enter immediately into domestic merchandising or consumption channels.

(2) For statistical purposes, commodities such as wheat and petroleum products entered directly into bonded manufacturing warehouses for further processing to be subsequently withdrawn for exportation are included with immediate consumption entries.

(b) Warehouse entries:

(1) Commodities entered into bonded storage warehouses.

(2) Imported ores and crude metals such as copper, lead, and zinc entered into bonded smelting and refining warehouses are included with warehouse entries.

A complete discussion of the compilation procedures and coverage for import statistics will be found in the foreword to the 1944 edition of Foreign Commerce and Navigation of the United States. Copies of the foreword are obtainable upon request.

Commodity descriptions and country names are abbreviated in this report where space does not permit complete description. See Schedule A, Statistical Classification of Imports Into the United States, for complete commodity descriptions and Schedule C, Code Classification of Countries (published as a part of Schedule A), for unabbreviated country names. A separate edition of Schedule C showing the countries, adjacent provinces, territories, and islands included under each country designation is also available.

The omission of a commodity classification or country name from this report indicates no transactions for that commodity or country.

Statistics of general imports of merchandise not shown in this section will be found in other sections of this report according to Schedule A commodity group.

Shipping weight, previously shown in this report, is discontinued effective with the statistics for the month of July, 1947.

IMPORT STATISTICS
William C. George

REPORT NO. FT 110

General imports include the following types of transactions:

(a) Immediate consumption entries:

(1) Commodities which, upon arrival, enter immediately into domestic merchandising or consumption channels.

(2) For statistical purposes, commodities such as wheat and petroleum products entered directly into bonded manufacturing warehouses for further processing to be subsequently withdrawn for exportation are included with immediate consumption entries.

(b) Warehouse entries:

(1) Commodities entered into bonded storage warehouses.

(2) Imported ores and crude metals such as copper, lead, and zinc entered into bonded smelting and refining warehouses are included with warehouse entries.

A complete discussion of the compilation procedures and coverage for import statistics will be found in the foreword to the 1944 edition of Foreign Commerce and Navigation of the United States. Copies of the foreword are obtainable upon request.

Commodity descriptions and country names are abbreviated in this report where space does not permit complete description. See Schedule A, Statistical Classification of Imports Into the United States, for complete commodity descriptions and Schedule C, Code Classification of Countries (published as a part of Schedule A), for unabbreviated country names. A separate edition of Schedule C showing the countries, adjacent provinces, territories, and islands included under each country designation is also available.

The omission of a commodity classification or country name from this report indicates no transactions for that commodity or country.

Statistics of general imports of merchandise not shown in this section will be found in other sections of this report according to Schedule A commodity group.

Shipping weight, previously shown in this report, was discontinued effective with the statistics for the month of July, 1947.

IMPORT STATISTICS

William C. George

REPORT NO. FT 110

General imports include the following types of transactions:

(a) Immediate consumption entries:

(1) Commodities which, upon arrival, enter immediately into domestic merchandising or consumption channels.

(2) For statistical purposes, commodities such as wheat and petroleum products entered directly into bonded manufacturing warehouses for further processing to be subsequently withdrawn for exportation are included with immediate consumption entries.

(b) Warehouse entries:

(1) Commodities entered into bonded storage warehouses.

(2) Imported ores and crude metals such as copper, lead, and zinc entered into bonded smelting and refining warehouses are included with warehouse entries.

A complete discussion of the compilation procedures and coverage for import statistics will be found in the foreword to the 1944 edition of Foreign Commerce and Navigation of the United States. Copies of the foreword are obtainable upon request.

Commodity descriptions and country names are abbreviated in this report where space does not permit complete description. See Schedule A, Statistical Classification of Imports Into the United States, for complete commodity descriptions and Schedule C, Code Classification of Countries (published as a part of Schedule A), for unabbreviated country names. A separate edition of Schedule C showing the countries, adjacent provinces, territories, and islands included under each country designation is also available.

The omission of a commodity classification or country name from this report indicates no transactions for that commodity or country.

Statistics of general imports of merchandise not shown in this section will be found in other sections of this report according to Schedule A commodity group.

Shipping weight, previously shown in this report, was discontinued effective with the statistics for the month of July, 1947.

IMPORT STATISTICS

William C. George

REPORT NO. FT 110

General imports include the following types of transactions:

(a) Immediate consumption entries:

(1) Commodities which, upon arrival, enter immediately into domestic merchandising or consumption channels.

(2) For statistical purposes, commodities such as wheat and petroleum products entered directly into bonded manufacturing warehouses for further processing to be subsequently withdrawn for exportation are included with immediate consumption entries.

(b) Warehouse entries:

(1) Commodities entered into bonded storage warehouses.

(2) Imported ores and crude metals such as copper, lead, and zinc entered into bonded smelting and refining warehouses are included with warehouse entries.

A complete discussion of the compilation procedures and coverage for import statistics will be found in the foreword to the 1944 edition of Foreign Commerce and Navigation of the United States. Copies of the foreword are obtainable upon request.

Commodity descriptions and country names are abbreviated in this report where space does not permit complete description. See Schedule A, Statistical Classification of Imports Into the United States, for complete commodity descriptions and Schedule C, Code Classification of Countries (published as a part of Schedule A), for unabbreviated country names. A separate edition of Schedule C showing the countries, adjacent provinces, territories, and islands included under each country designation is also available.

The omission of a commodity classification or country name from this report indicates no transactions for that commodity or country.

Statistics of general imports of merchandise not shown in this section will be found in other sections of this report according to Schedule A commodity group.

Shipping weight, previously shown in this report, was discontinued effective with the statistics for the month of July, 1947.

IMPORT STATISTICS
William C. George

REPORT NO. FT 110

General imports include the following types of transactions:

(a) Immediate consumption entries:

(1) Commodities which, upon arrival, enter immediately into domestic merchandising or consumption channels.

(2) For statistical purposes, commodities such as wheat and petroleum products entered directly into bonded manufacturing warehouses for further processing to be subsequently withdrawn for exportation are included with immediate consumption entries.

(b) Warehouse entries:

(1) Commodities entered into bonded storage warehouses.

(2) Imported ores and crude metals such as copper, lead, and zinc entered into bonded smelting and refining warehouses are included with warehouse entries.

A complete discussion of the compilation procedures and coverage for import statistics will be found in the foreword to the 1944 edition of Foreign Commerce and Navigation of the United States. Copies of the foreword are obtainable upon request.

Commodity descriptions and country names are abbreviated in this report where space does not permit complete description. See Schedule A, Statistical Classification of Imports Into the United States, for complete commodity descriptions and Schedule C, Code Classification of Countries (published as a part of Schedule A), for unabbreviated country names. A separate edition of Schedule C showing the countries, adjacent provinces, territories, and islands included under each country designation is also available.

The omission of a commodity classification or country name from this report indicates no transactions for that commodity or country.

Statistics of general imports of merchandise not shown in this section will be found in other sections of this report according to Schedule A commodity group.

Shipping weight, previously shown in this report, was discontinued effective with the statistics for the month of July, 1947.

Assistant Chief

IMPORT STATISTICS
William C. George

REPORT NO. FT 110

General imports include the following types of transactions:

(a) Immediate consumption entries:

(1) Commodities which, upon arrival, enter immediately into domestic merchandising or consumption channels.

(2) For statistical purposes, commodities such as wheat and petroleum products entered directly into bonded manufacturing warehouses for further processing to be subsequently withdrawn for exportation are included with immediate consumption entries.

(b) Warehouse entries:

(1) Commodities entered into bonded storage warehouses.

(2) Imported ores and crude metals such as copper, lead, and zinc entered into bonded smelting and refining warehouses are included with warehouse entries.

A complete discussion of the compilation procedures and coverage for import statistics will be found in the foreword to the 1944 edition of Foreign Commerce and Navigation of the United States. Copies of the foreword are obtainable upon request.

Commodity descriptions and country names are abbreviated in this report where space does not permit complete description. See Schedule A, Statistical Classification of Imports Into the United States, for complete commodity descriptions and Schedule C, Code Classification of Countries (published as a part of Schedule A), for unabbreviated country names. A separate edition of Schedule C showing the countries, adjacent provinces, territories, and islands included under each country designation is also available.

The omission of a commodity classification or country name from this report indicates no transactions for that commodity or country.

Statistics of general imports of merchandise not shown in this section will be found in other sections of this report according to Schedule A commodity group.

Shipping weight, previously shown in this report, was discontinued effective with the statistics for the month of July, 1947.

Assistant Chief

IMPORT STATISTICS
William C. George

REPORT NO. FT 110

General imports include the following types of transactions:

(a) Immediate consumption entries:

(1) Commodities which, upon arrival, enter immediately into domestic merchandising or consumption channels.

(2) For statistical purposes, commodities such as wheat and petroleum products entered directly into bonded manufacturing warehouses for further processing to be subsequently withdrawn for exportation are included with immediate consumption entries.

(b) Warehouse entries:

(1) Commodities entered into bonded storage warehouses.

(2) Imported ores and crude metals such as copper, lead, and zinc entered into bonded smelting and refining warehouses are included with warehouse entries.

A complete discussion of the compilation procedures and coverage for import statistics will be found in the foreword to the 1944 edition of Foreign Commerce and Navigation of the United States. Copies of the foreword are obtainable upon request.

Commodity descriptions and country names are abbreviated in this report where space does not permit complete description. See Schedule A, Statistical Classification of Imports Into the United States, for complete commodity descriptions and Schedule C, Code Classification of Countries (published as a part of Schedule A), for unabbreviated country names. A separate edition of Schedule C showing the countries, adjacent provinces, territories, and islands included under each country designation is also available.

The omission of a commodity classification or country name from this report indicates no transactions for that commodity or country.

Statistics of general imports of merchandise not shown in this section will be found in other sections of this report according to Schedule A commodity group.

Shipping weight, previously shown in this report, was discontinued effective with the statistics for the month of July, 1947.

Assistant Chief

IMPORT STATISTICS

William C. George

REPORT NO. FT 110

General imports include the following types of transactions:

(a) Immediate consumption entries:

(1) Commodities which, upon arrival, enter immediately into domestic merchandising or consumption channels.

(2) For statistical purposes, commodities such as wheat and petroleum products entered directly into bonded manufacturing warehouses for further processing to be subsequently withdrawn for exportation are included with immediate consumption entries.

(b) Warehouse entries:

(1) Commodities entered into bonded storage warehouses.

(2) Imported ores and crude metals such as copper, lead, and zinc entered into bonded smelting and refining warehouses are included with warehouse entries.

A complete discussion of the compilation procedures and coverage for import statistics will be found in the foreword to the 1944 edition of Foreign Commerce and Navigation of the United States. Copies of the foreword are obtainable upon request.

Commodity descriptions and country names are abbreviated in this report where space does not permit complete description. See Schedule A, Statistical Classification of Imports Into the United States, for complete commodity descriptions and Schedule C, Code Classification of Countries (published as a part of Schedule A), for unabbreviated country names. A separate edition of Schedule C showing the countries, adjacent provinces, territories, and islands included under each country designation is also available.

The omission of a commodity classification or country name from this report indicates no transactions for that commodity or country.

Statistics of general imports of merchandise not shown in this section will be found in other sections of this report according to Schedule A commodity group.

Shipping weight, previously shown in this report, was discontinued effective with the statistics for the month of July, 1947.

IMPORT STATISTICS
William C. George

REPORT NO. FT 110

General imports include the following types of transactions:

(a) Immediate consumption entries:

(1) Commodities which, upon arrival, enter immediately into domestic merchandising or consumption channels.

(2) For statistical purposes, commodities such as wheat and petroleum products entered directly into bonded manufacturing warehouses for further processing to be subsequently withdrawn for exportation are included with immediate consumption entries.

(b) Warehouse entries:

(1) Commodities entered into bonded storage warehouses.

(2) Imported ores and crude metals such as copper, lead, and zinc entered into bonded smelting and refining warehouses are included with warehouse entries.

A complete discussion of the compilation procedures and coverage for import statistics will be found in the foreword to the 1944 edition of Foreign Commerce and Navigation of the United States. Copies of the foreword are obtainable upon request.

Commodity descriptions and country names are abbreviated in this report where space does not permit complete description. See Schedule A, Statistical Classification of Imports Into the United States, for complete commodity descriptions and Schedule C, Code Classification of Countries (published as a part of Schedule A), for unabbreviated country names. A separate edition of Schedule C showing the countries, adjacent provinces, territories, and islands included under each country designation is also available.

The omission of a commodity classification or country name from this report indicates no transactions for that commodity or country.

Statistics of general imports of merchandise not shown in this section will be found in other sections of this report according to Schedule A commodity group.

Shipping weight, previously shown in this report, was discontinued effective with the statistics for the month of July, 1947.

IMPORT STATISTICS

William C. George

REPORT NO. FT 110

General imports include the following types of transactions:

(a) Immediate consumption entries:

(1) Commodities which, upon arrival, enter immediately into domestic merchandising or consumption channels.

(2) For statistical purposes, commodities such as wheat and petroleum products entered directly into bonded manufacturing warehouses for further processing to be subsequently withdrawn for exportation are included with immediate consumption entries.

(b) Warehouse entries:

(1) Commodities entered into bonded storage warehouses.

(2) Imported ores and crude metals such as copper, lead, and zinc entered into bonded smelting and refining warehouses are included with warehouse entries.

A complete discussion of the compilation procedures and coverage for import statistics will be found in the foreword to the 1944 edition of Foreign Commerce and Navigation of the United States. Copies of the foreword are obtainable upon request.

Commodity descriptions and country names are abbreviated in this report where space does not permit complete description. See Schedule A, Statistical Classification of Imports Into the United States, for complete commodity descriptions and Schedule C, Code Classification of Countries (published as a part of Schedule A), for unabbreviated country names. A separate edition of Schedule C showing the countries, adjacent provinces, territories, and islands included under each country designation is also available.

The omission of a commodity classification or country name from this report indicates no transactions for that commodity or country.

Statistics of general imports of merchandise not shown in this section will be found in other sections of this report according to Schedule A commodity group.

Shipping weight, previously shown in this report, was discontinued effective with the statistics for the month of July, 1947.

GENERAL IMPORTS OF MERCHANDISE

Commodity by Country of Origin

REPORT NO. FT 110

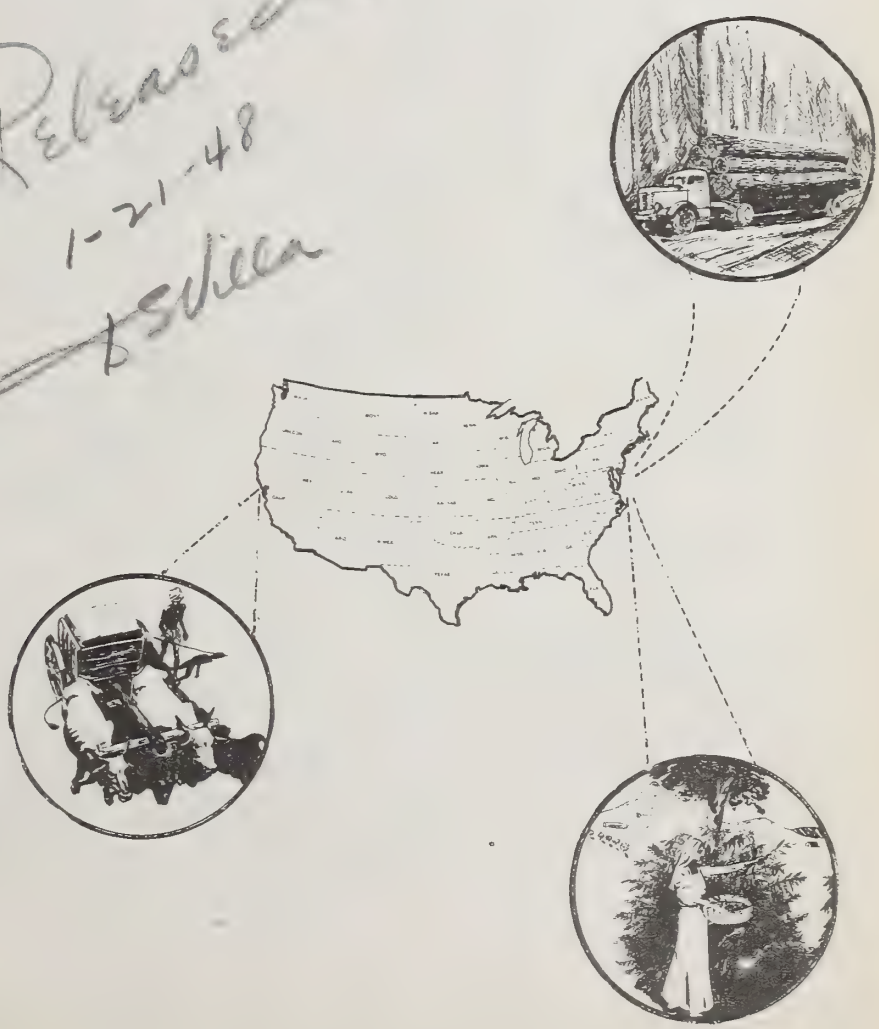
Released
1-21-48

November 1947



JANUARY 1948

Bureau of the Census

J. C. Capt, Director

A. ROSS ECKLER
Assistant Director

HOWARD C. GRIEVES
Assistant Director

MORRIS H. HANSEN
Statistical Assistant to the Director

RALPH E. GALLOWAY
Executive Assistant to the Director

Prepared under the supervision of

J. EDWARD ELY
Chief, Foreign Trade Division

IRVING WEISS
Assistant Chief

IMPORT STATISTICS
William C. George

REPORT NO. FT 110

General imports include the following types of transactions:

(a) Immediate consumption entries:

(1) Commodities which, upon arrival, enter immediately into domestic merchandising or consumption channels.

(2) For statistical purposes, commodities such as wheat and petroleum products entered directly into bonded manufacturing warehouses for further processing to be subsequently withdrawn for exportation are included with immediate consumption entries.

(b) Warehouse entries:

(1) Commodities entered into bonded storage warehouses.

(2) Imported ores and crude metals such as copper, lead, and zinc entered into bonded smelting and refining warehouses are included with warehouse entries.

A complete discussion of the compilation procedures and coverage for import statistics will be found in the foreword to the 1944 edition of Foreign Commerce and Navigation of the United States. Copies of the foreword are obtainable upon request.

Commodity descriptions and country names are abbreviated in this report where space does not permit complete description. See Schedule A, Statistical Classification of Imports Into the United States, for complete commodity descriptions and Schedule C, Code Classification of Countries (published as a part of Schedule A), for unabbreviated country names. A separate edition of Schedule C showing the countries, adjacent provinces, territories, and islands included under each country designation is also available.

The omission of a commodity classification or country name from this report indicates no transactions for that commodity or country.

FT 110 previously published in 3 sections is published as a single report effective with the statistics for the month of November 1947.

Shipping weight, previously shown in this report, was discontinued effective with the statistics for the month of July, 1947.

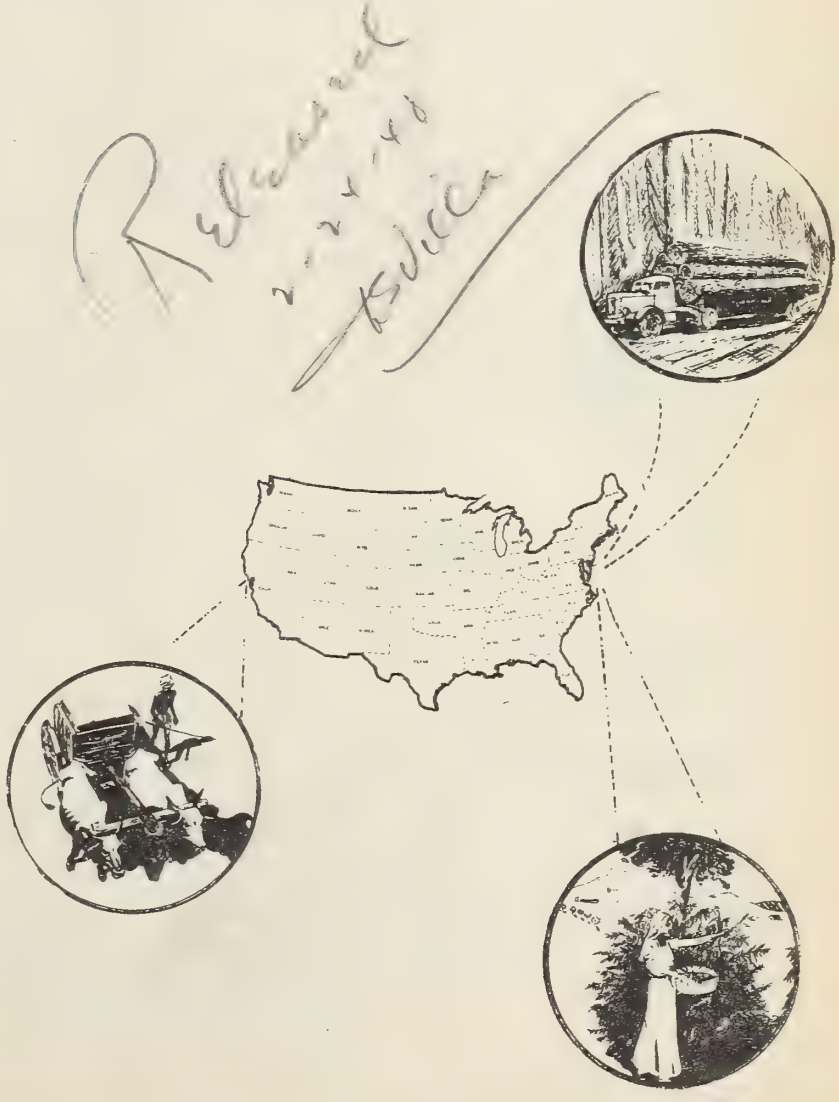
REPORT NO. FT 110

December 1947



FEBRUARY 1948

REPORT NO. FT 110

Bureau of the Census

J. C. Capt, Director

A. ROSS ECKLER
Assistant Director

HOWARD C. GRIEVES
Assistant Director

MORRIS H. HANSEN
Statistical Assistant to the Director

Prepared under the supervision of

J. EDWARD ELY
Chief, Foreign Trade Division

IRVING WEISS
Assistant Chief

IMPORT STATISTICS

William C. George

General imports include the following types of transactions:

(a) Immediate consumption entries:

(1) Commodities which, upon arrival, enter immediately into domestic merchandising or consumption channels.

(2) For statistical purposes, commodities such as wheat and petroleum products entered directly into bonded manufacturing warehouses for further processing to be subsequently withdrawn for exportation are included with immediate consumption entries.

(b) Warehouse entries:

(1) Commodities entered into bonded storage warehouses.

(2) Imported ores and crude metals such as copper, lead, and zinc entered into bonded smelting and refining warehouses are included with warehouse entries.

A complete discussion of the compilation procedures and coverage for import statistics will be found in the foreword to the 1944 edition of Foreign Commerce and Navigation of the United States. Copies of the foreword are obtainable upon request.

Commodity descriptions and country names are abbreviated in this report where space does not permit complete description. See Schedule A, Statistical Classification of Imports Into the United States, for complete commodity descriptions and Schedule C, Code Classification of Countries (published as a part of Schedule A), for unabbreviated country names. A separate edition of Schedule C showing the countries, adjacent provinces, territories, and islands included under each country designation is also available.

The omission of a commodity classification or country name from this report indicates no transactions for that commodity or country.

FT 110 previously published in 3 sections is published as a single report effective with the statistics for the month of November 1947.

Shipping weight, previously shown in this report, is discontinued effective with the statistics for the month of July, 1947.

United States Imports for Consumption will be shown instead of General Imports in Report No. FT 110 effective with the statistics for the month of January 1948.

The Calendar Year 1947 issue of Report No. FT 110 will contain information on both Imports for Consumption and General Imports.
